

Corrective Actions: A Step Ahead with PrimusGFS

You deserve to know...

There is so much more to suppliers' audits than the final score! PrimusGFS audits now require a corrective action (CA) to close out every nonconformance (NC) found during the audit in order to be certified. There has been increasing demand from customers wanting visibility to see that their suppliers' audits are not only certified, but that all NC's raised during the audit have been addressed.

PrimusGFS and the Azzule Supply Chain Program partner to give your food safety team access and visibility to your suppliers' full audit reports, NCs, CAs, and certificates to make timely decisions and comply with customers. With the new PrimusGFS Corrective Action Program, your suppliers will be a step ahead of the competition and certificates to help you to make timely decisions.
